Features and Benefits

Replacing the PG04 the new Hopkins PG03 Peanut Grinder is the ideal hydraulic driven tool for underwater maintenance & inspection jobs. It is primarily designed for weld seam grinding and hole de-burring in steel structures although it is also suitable for a host of other applications.

With its 6mm sized collet chuck, there is a vast range of rotary burrs and accessories readily available off-the-shelf to suit any application.

It can be run from a wide range of hydraulic flows from 15 to 40lpm @ 140bar.

This versatility means that the PG03 Peanut Grinder can be run from almost any hydraulic circuit.

This professional tool features a safety trigger system which prevents accidental operation of the tool.

The power-to-weight ratio of the PG03 brings even the toughest jobs down to size.

The tool is presented in a tough protective tool case and comes with Hopkins ALL-CUT diamond grit disc.

This tool is primarily designed for underwater use.
