### Features and Benefits

The versatile CD10 hydraulic driven core drill is ideal for just about any core drilling job be it in an underwater environment or on land.

The 3-speed gearbox gives the ability to drill core holes up to a diameter of 160mm when mounted in a suitable drill stand and 82mm when operated freehand.

Hydraulic connection is simply made via the hose whips and flat face couplers, water flush connection is made through the Gardena coupler.

This professional tool features a D-handle and large multi-positional assist handle which makes it very easy to control and manoeuvre. The power-to-weight ratio of the CD10 brings even the toughest jobs down to size.

The Core Drill also comes complete with a depth gauge attachment.

**This CD10 Core Drill carries ATEX certification and is primarily for underwater use but can also be used on land.**
