

HYCON HWP4 SUBMERSIBLE PUMPS

PRODUCT FEATURES

The HWP4 water pump is in a class of its own. With a capacity of up to 120 m³/h it can be used even in ground water lowering applications, where usually much bigger and extremely expensive pumps are being used.

Paired with for instance our 11 kW electric or 18HP gasoline power packs it is a heavy-duty solution with remarkable cost reductions compared with other pumping systems. It will work all day every day, because of the Hydraulic direct drive motor that will make sure that the pump can run dry without damage to the motor or seals.

The clever impeller design ensure that the pump is unaffected of particles size up to 74mm.

HYDRAULIC SUBMERSIBLE PUMP HWP4

Item no. HWP4, 30-40 l.p.m. **3030004**
PLEASE NOTE: Discharge Hose Kit (incl. 4" BSP Male coupling) is not included.

10 m. discharge hose kit incl. 4" BSP Male Coupling **4032699**

Weight, kg 26,7

Oil Flow, lpm 30-40

Max pressure, bar 172

Capacity, m³/h 127

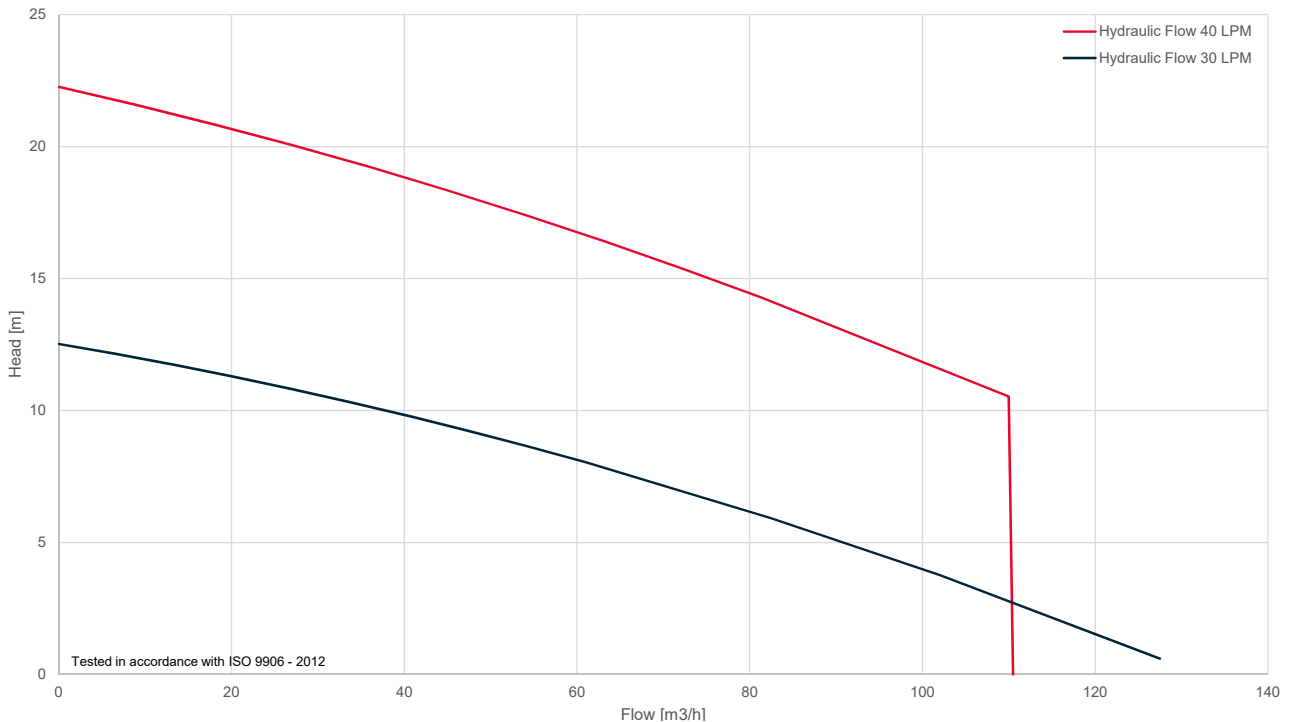

Max head, m 22

Max solids, mm \varnothing 74

Outlet 4" BSP

HYCON HWP4 PERFORMANCE CURVE

4" Submersible Pump
