

Husqvarna SMART-E

Husqvarna Smart-E is our most powerful concrete vibrator for professional customers. It is an electronic high frequency vibrator with an intelligent, integrated frequency converter, combining reliability and performance with the latest technology. The high centrifugal force, stable speed and high amplitude ensure excellent concrete vibration with fewer dips. The pistol grip handle is perfectly suited for vibration of floors and reduces hand/arm vibrations.

Keep vibrations in the concrete

The innovative motor-in-head design and the de-vibrated handle ensure vibrations to stay inside the concrete, where they belong, instead of in your hands and arms.

Extend your reach

Fifteen meters of cable provide you with exceptional reach around the worksite.

Powerful and reliable

Constant vibrations at 12,000 vpm ensures high centrifugal force, stable speed and high amplitude, which results in excellent concrete vibration with fewer dips in any type of concrete slump.

Smart ergonomics

The ergonomic pistol grip handle is designed to further reduce vibrations in your hands and arms.

FEATURES

- Powerful and reliable
 - Extend your reach
 - Keep vibrations in the concrete
 - Smart ergonomics
- Plug-and-work
 - Less noise, no emissions
 - Fixed green light means ready
