

Husqvarna®

Husqvarna DE 110i

This versatile H-class dust extractor is powered by Husqvarna's own 36 V BLi batteries and is an excellent match for handheld battery equipment. It features a user-friendly HMI and an e-flow function that automatically adjusts the air flow while securing high runtime from the batteries. Its high water protection enables fast and efficient decontamination. It also features embedded connectivity allowing you to swiftly monitor location, service and filter status along with other valuable usage data.

Motor

Max. vacuum	170 mbar
Rated input power	0.9 kW

Dimensions

Product size length	670 mm
Product size width	400 mm
Product size height	1000 mm
Weight	26 kg

Features for DE 110i

Flexible battery power

Autonomy and flexibility are yours with this battery-powered dust extractor. Skip cords and don't worry about power source on the job site. Battery run time is optimised thanks to the ingenious e-flow system which automatically adjusts air flow.

High safety standards

The dust extractor complies with the latest H-class standards for dust extractors for heavy-duty usage. It contains a HEPA filter (with EN1822 certification) which is separated from the pre-filter. An integrated filter alarm with adjustable hose-diameter indicates when it is time to clean the filter. Cleaning can be done by simply pressing a button.

Easy to transport

Thanks to its compact size and light weight, the dust extractor is easy to transport. Smart details, such as lifting hooks, the possibility to attach hoses, wand and floor tool to the machine and the ability to drive it on its two wheels allow for smooth manoeuvring.

Easy to clean and maintain

The high water protection standard allows for easy cleaning and decontamination of the machine. The HMI gives warnings on operational maintenance for early and on-site trouble-shooting.
